

Welcome to SAFER's new office in Kuggen!

We are delighted to welcome our partners to SAFER's new premium facilities at Kuggen, Lindholmsplatsen 1, second floor, right at the heart of Lindholmen Innovation District.

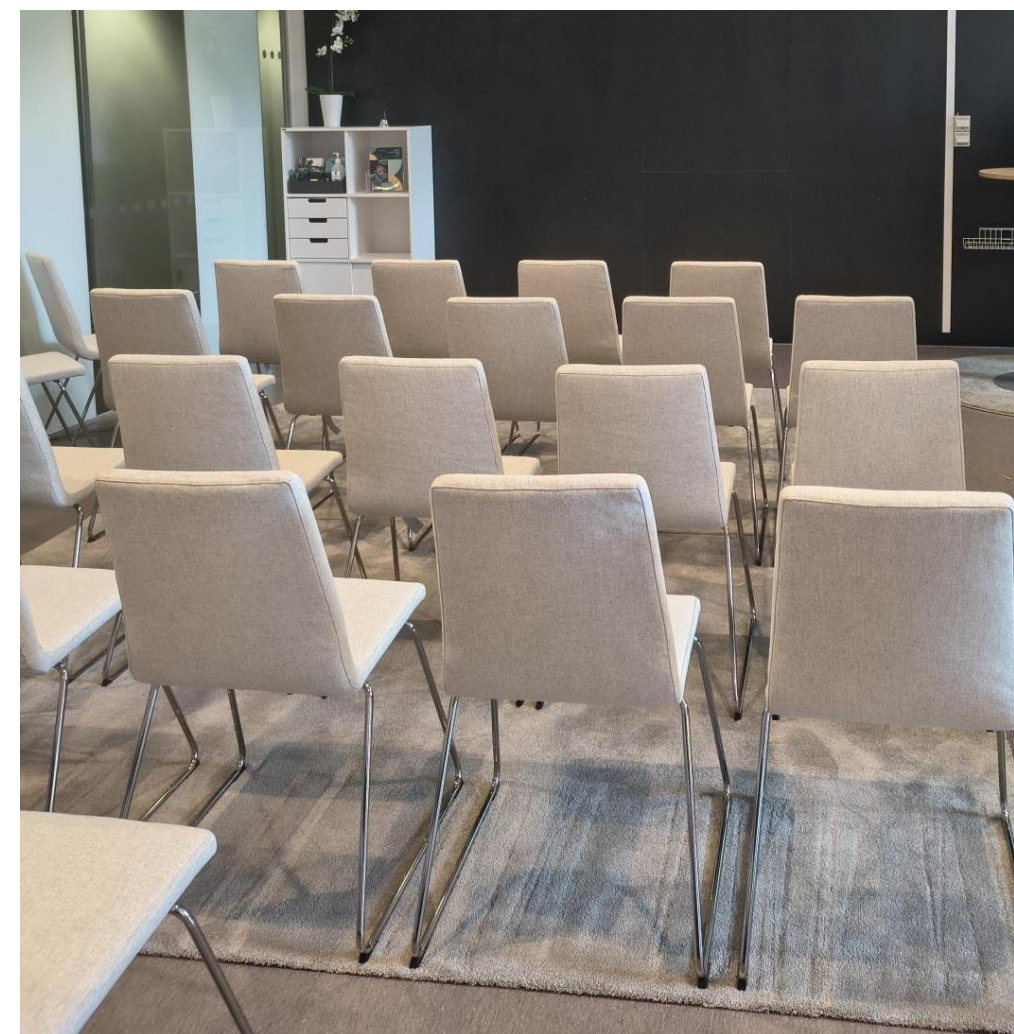

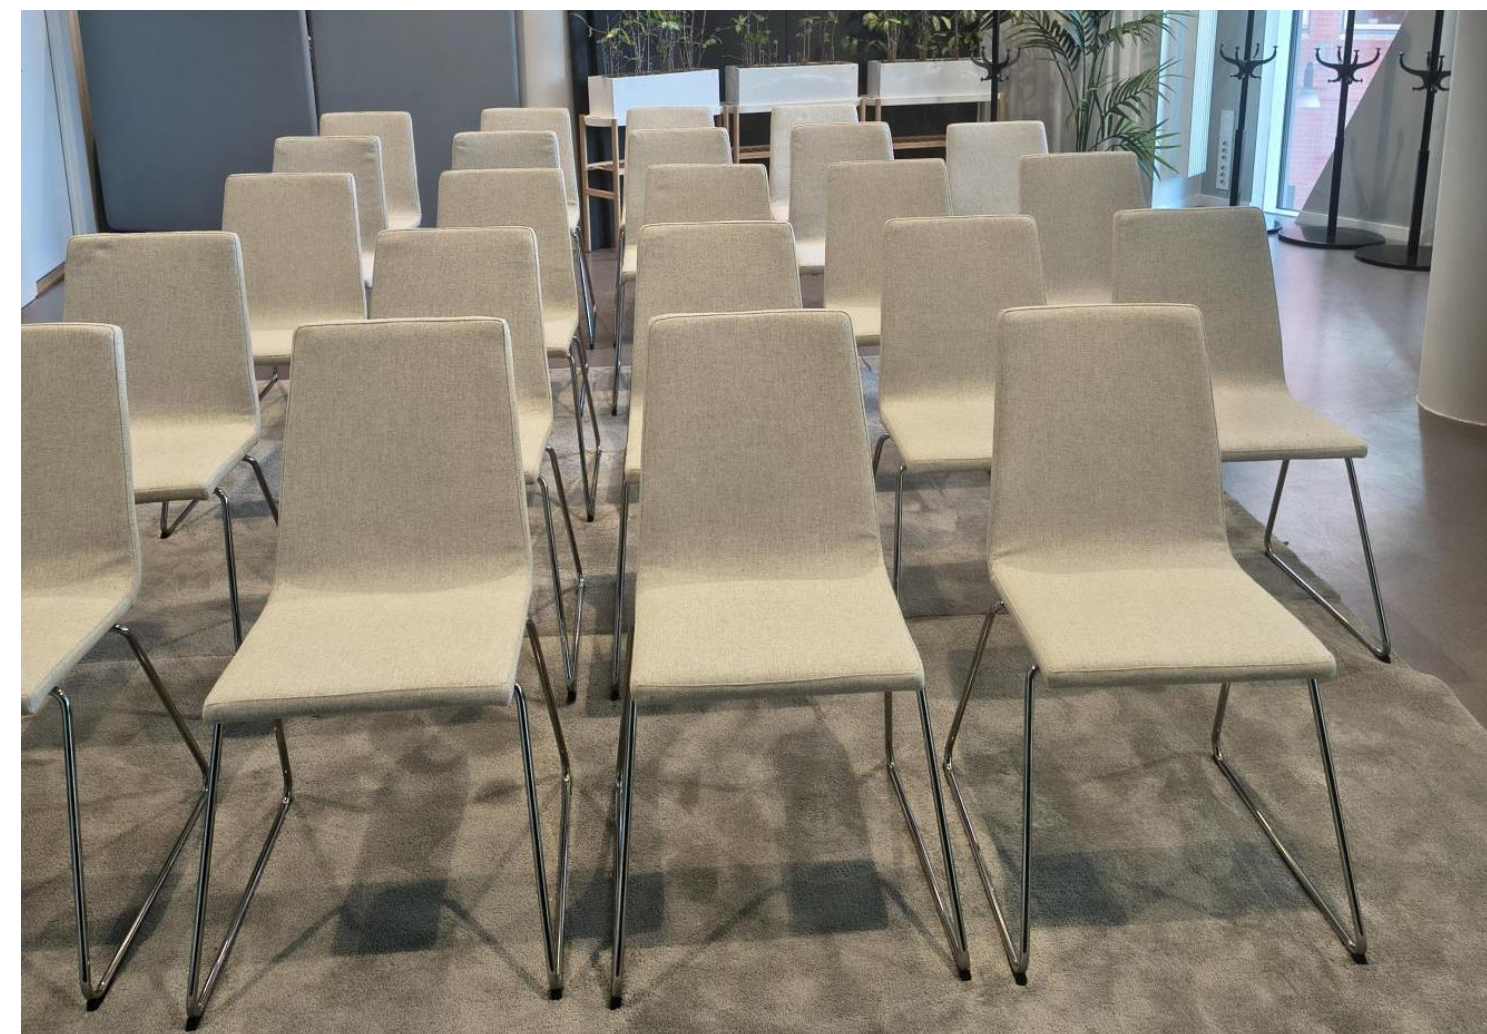

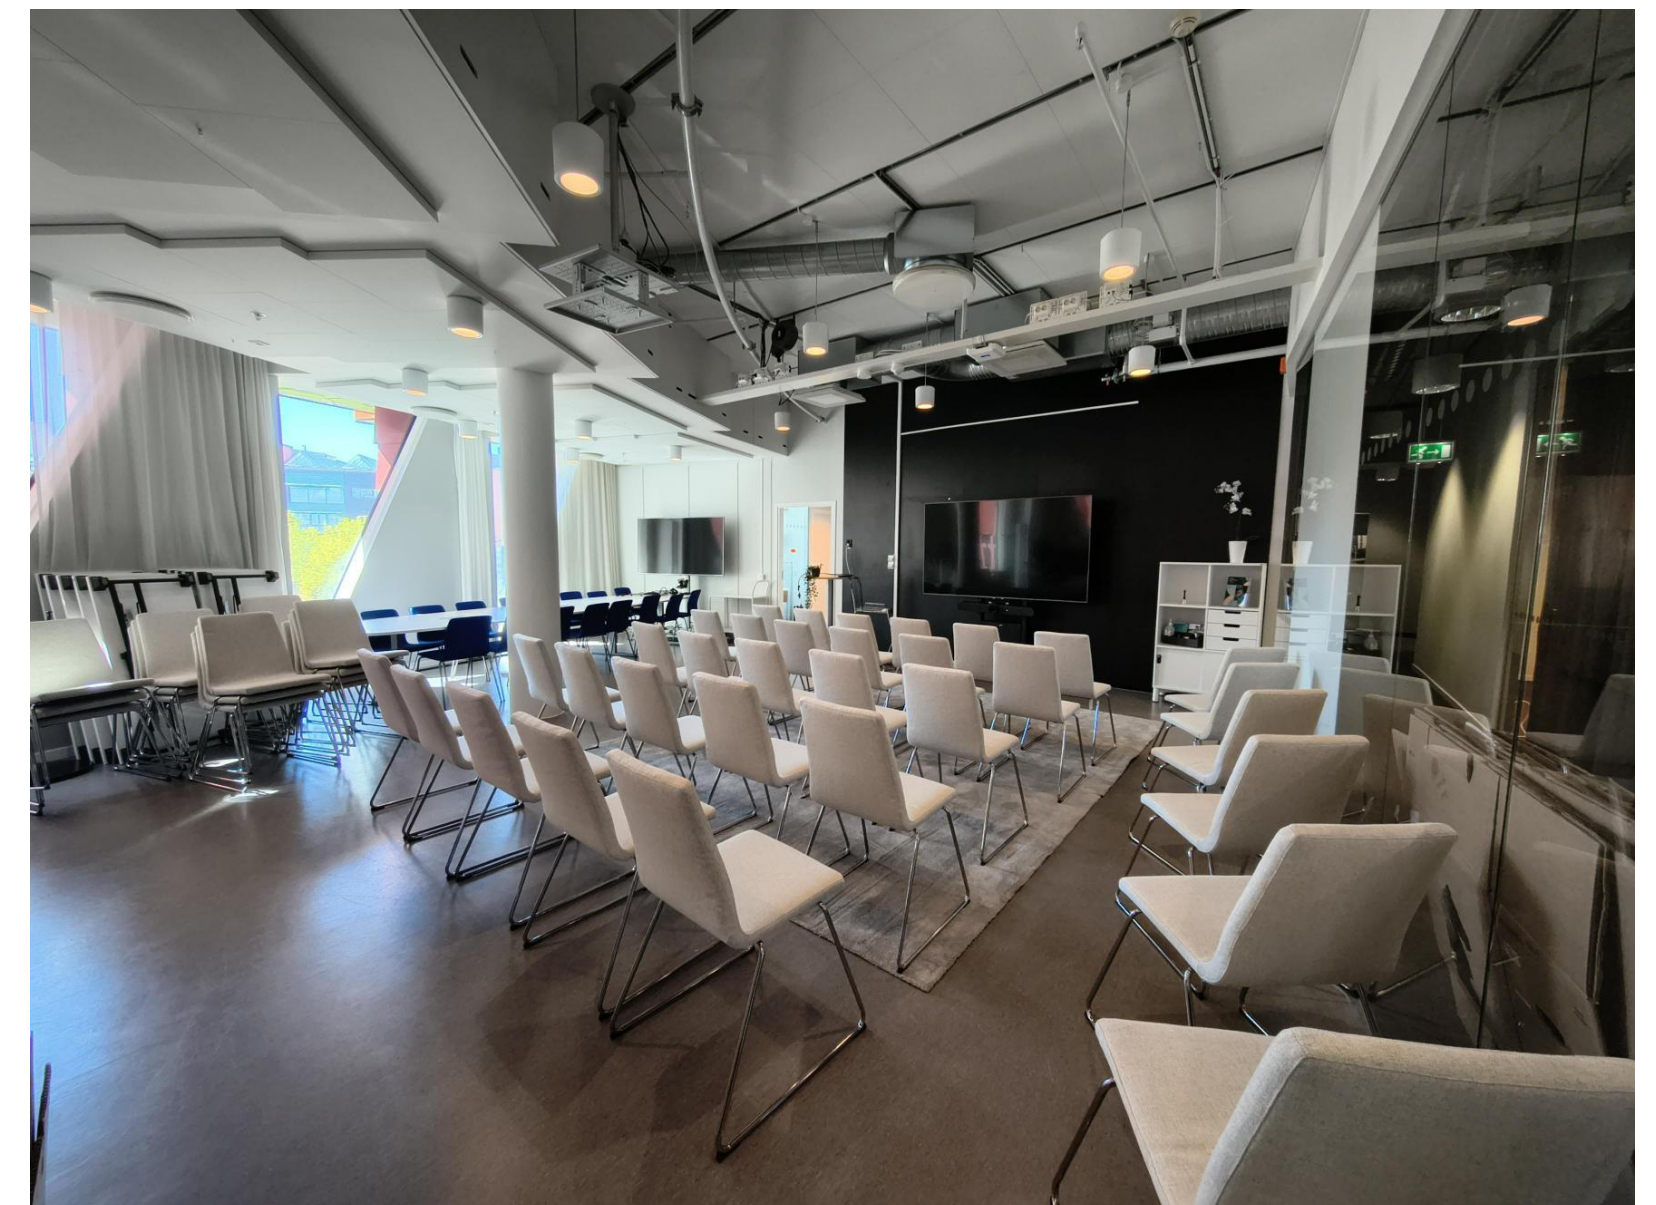

The new spaces are designed specifically for co-creation, learning and collaboration. We warmly welcome you to host project meetings, working group sessions, workshops, seminars and other collaborative activities here. Whether you are planning focused discussions, larger partner meetings or creative breakout sessions, the facilities are built to support dynamic interaction and knowledge exchange in an inspiring environment.

Livbojen

Our new facilities include a flexible 71 m² conference room, well suited for everything from larger presentations to interactive workshops. The room accommodates around 50 participants in theatre seating and also features a boardroom setup for 16 people. Moveable tables make it easy to adapt the space to different needs and formats.

The room will be fully equipped with hybrid meeting technology, sound capture throughout the space, as well as a projector and screen, creating a professional setting for both in-person and digital participation.

Reflexen

Our smaller conference room offers a comfortable setting for 8-10 people and is ideal for meetings, focused discussions and smaller workshops. The 17 m² room is equipped with audio support for hybrid meetings, while participants use their own laptop cameras for video.

The room can also be used as a breakout space for group work during larger events and conferences.

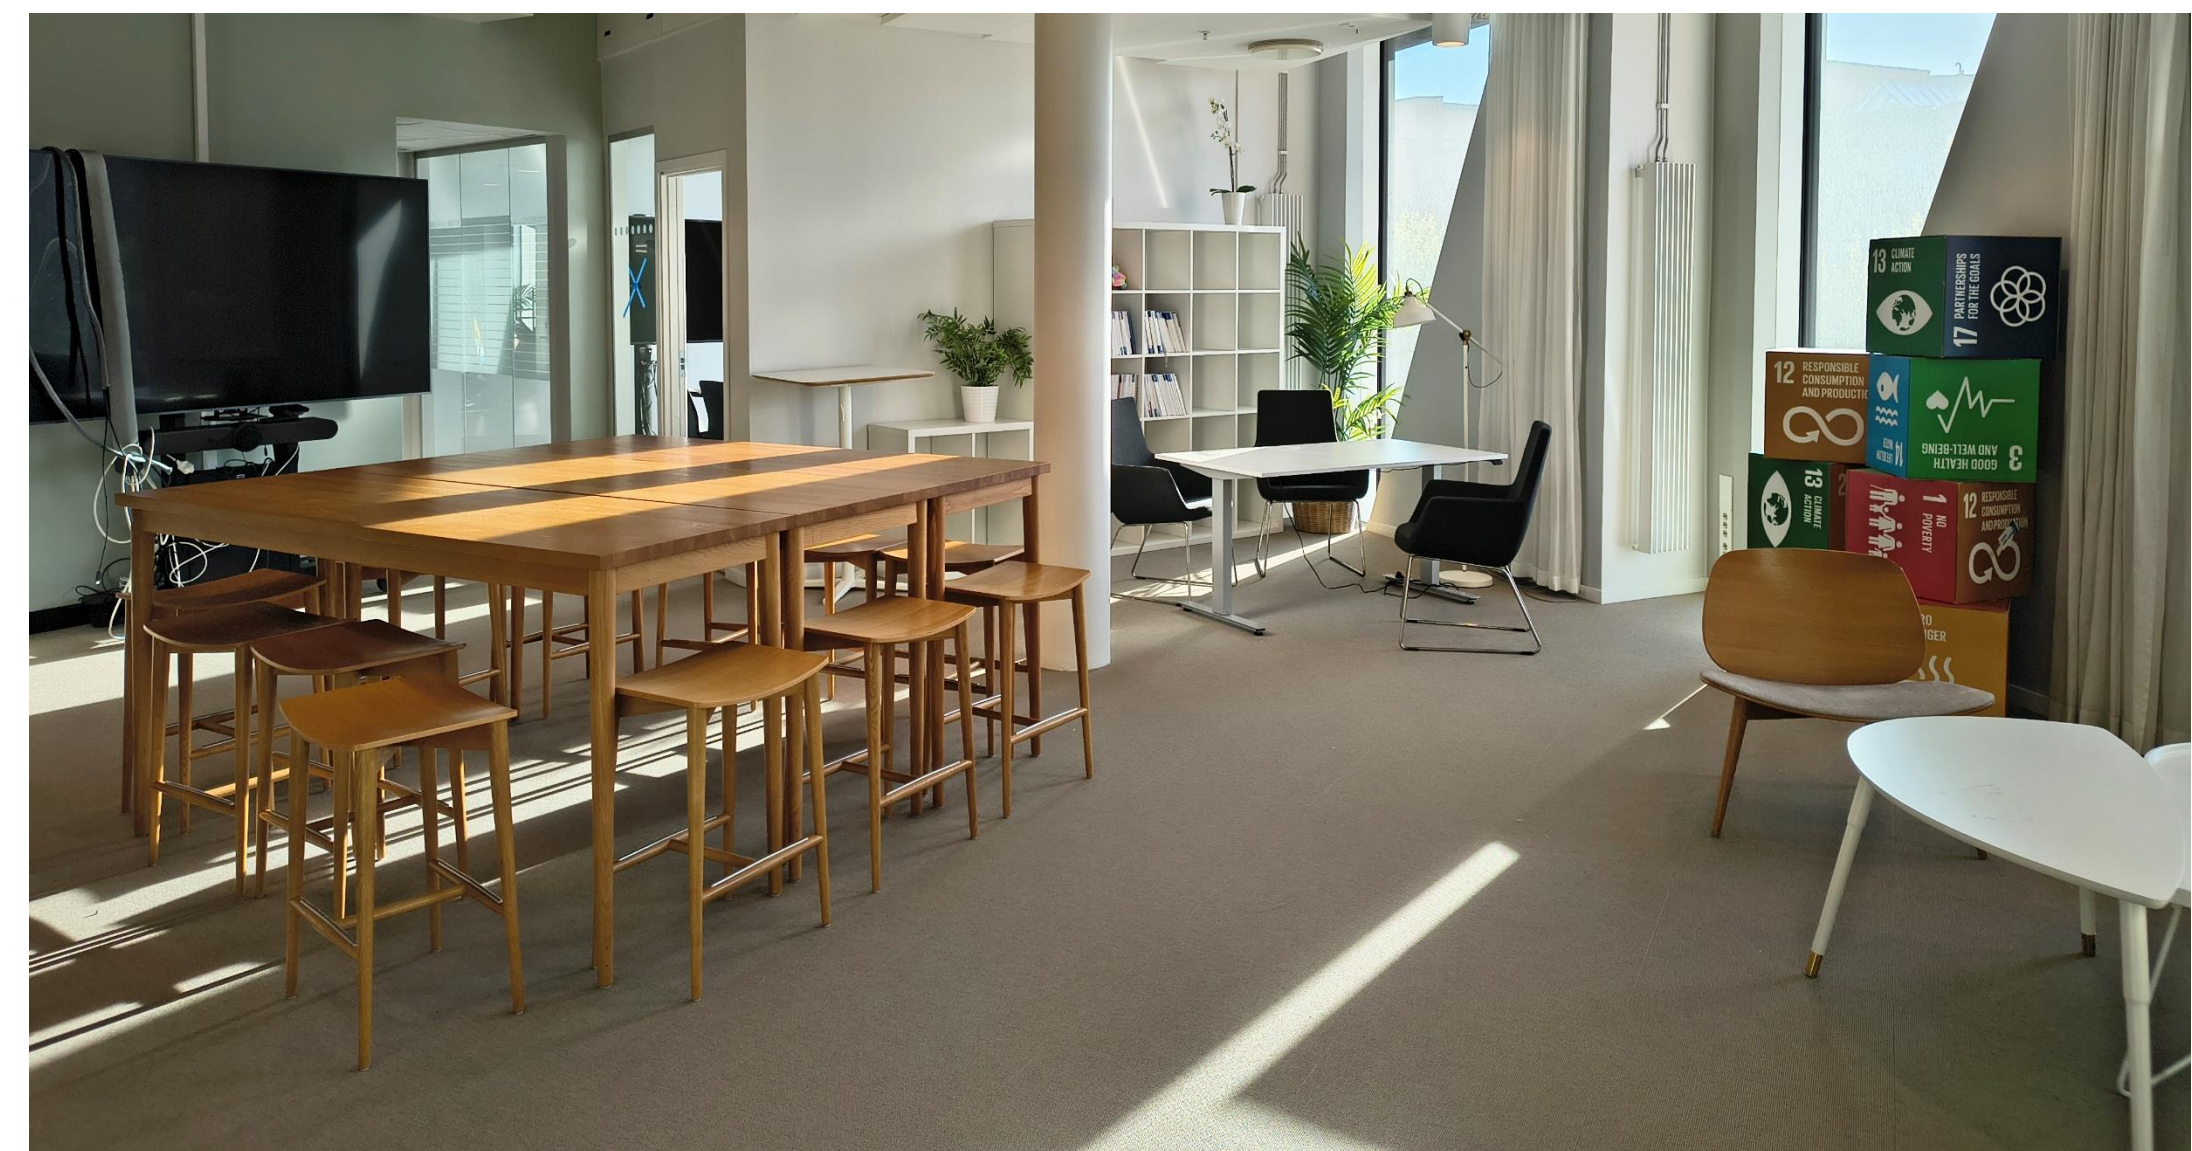

Loungen

The lounge is a dynamic collaboration space for mingling, networking, informal meetings and meals. The 61 m² area includes a kitchenette and space for food service, making it well suited for coffee breaks, lunches and lunch seminars.

The lounge offers three flexible zones: a large collaboration table with 12 seats, a comfortable sofa area with seating for around 10 people, and a workspace area with 4-6 additional seats that can be used for guest work or breakout sessions. During events, the space can support up to three group work areas.

Presentations for up to 30 participants can also be arranged in hybrid format, creating a welcoming and versatile environment for both collaboration and social interaction.

Office area

The office area is home to the SAFER operational team and also offers several touchdown workspaces for working between meetings or when visiting for the day. The larger collaboration table can also be used for individual work when available.

This is a quieter area, so we keep conversations at a lower volume.

Think & Talk room

The Think & Talk Room is a small and flexible space for 1-4 people, available for spontaneous use without booking. It is ideal for focused work, informal meetings or quick discussions, and can also be used as a breakout room during larger events and workshops.

Analysis room

The Analysis Room is dedicated to studies involving naturalistic driving data and is intended for specialised research activities. Access is provided through specific agreements, and the room must be booked in advance.
